6. Repeat for Private Headers

The screenshot shows the ZoneAlarm Security Suite interface. The main window is titled "Privacy" and contains a table of sites. The table has the following columns: Site, Edited, Mobile Code, Cookie Control (with sub-columns for Session, Persistent, and 3rd Party), Web Bugs, and Private Header. The first row shows "umi.com" with a pencil icon in the Edited column, green checkmarks in Mobile Code, Cookie Control, and Private Header, and a red X in Web Bugs. Below the table is an "Entry Detail" section with "Add" and "Options" buttons. The left sidebar contains navigation options: Overview, Firewall, Program Control, Antivirus, E-mail Protection, Privacy, ID Lock, IM Security, Web Filtering, and Alerts & Logs. The top status bar shows "INTERNET IN OUT" with a "STOP" button and "PROGRAMS All Systems Active".

Site	Edited	Mobile Code	Cookie Control			Web Bugs	Private Header
			Session	Persistent	3rd Party		
umi.com		✓	✓	✓	✓	✗	✓

7. Repeat steps 3 – 6 using proquest.com instead of umi.com
8. Repeat steps 3 – 6 but use auth.athensams.net
9. Repeat steps 3 – 6 but use pqathens.umi.com

10. Log into ProQuest via your library's site.
